Comprehensive Solutions for Inventory Management

StockPerson In-a-Box | Inventory Management allows users to track item levels and movements or take physical inventories and cycle counts in the warehouse, distribution center, stockroom or store. Using LXE's MX8 and Redbeam's Inventory Control application, this solution allows users to:

- Speed up inventory movements
- Reduce inventory levels
- Minimize out of stock situations
- Increase accountability
- Create one central inventory database

By optimizing purchasing, reducing shrinkage and minimizing paperwork, workers will increase efficiency and productivity in the warehouse, allowing for a quick return on investment.

StockPerson In-a-Box | Inventory Management is available exclusively at BlueStar!
