WHAT ARE THE ET40-HC/ET45-HC HEALTHCARE TABLETS?

Built to meet the demands of healthcare — and your budget

Are you considering deploying consumer-grade tablets for your mission-critical healthcare environment? Zebra has the perfect alternative — the ET40-HC and ET45-HC healthcare rugged tablets. Built for healthcare from the inside out, these right-priced tablets offer everything you need, right out of the box. Disinfectant-ready medical grade plastics. An emergency alert button. Integrated enterprise-class scanning. The fastest wireless connections. A multi-year lifecycle. And Zebra-only Mobility DNA tools that improve every aspect of the device lifecycle.

WHY SHOULD YOU BUY THE ET40-HC/ET45-HC?

TOP 5 CUSTOMER BENEFITS

1

No compromises — a tablet designed for healthcare.

Unlike consumer and general purpose devices, every aspect of the ET40-HC/ET45-HC has been designed for healthcare. Advanced medical grade plastics enable frequent cleaning with some of the harshest disinfectants to prevent the spread of germs between caregivers and patients. A dedicated emergency red alert button improves patient and clinician safety. And a rugged design is built to last for years — providing the reliable operation that your mission critical world of healthcare demands.

2

World class data capture — right out of the box.

Error-proof patient identification, medication administration and more with the scanning performance that has made Zebra the market leader. Caregivers can count on split-second first time capture of virtually every barcode in practically any condition — enabling them to spend more time with patients, and less time working around a failed scan. And since the scanner is integrated, you won't need to buy a separate scanning sled that can increase weight by more than 50% or license third-party software.

3

A force multiplier for your staff.

Today's time-pressed clinical staff needs a force multiplier — and the ET40-HC/ET45-HC delivers. Wi-Fi 6 and 5G (ET45-HC) provide the fastest, most reliable wireless connections. You get the computing power to run all your clinical applications and the large 10.1 in. display offers more room to view patient records at once. The front-facing camera enables telehealth applications. Caregivers get a true workstation experience on a desk or cart with the Workstation cradle.¹ And tablets can double as a cordless PBX handset and support secure text messaging.²

4

Lifecycle and support you can count on.

Fast-moving consumer trends mean that consumer devices have a short lifecycle. When it's time to expand your fleet or replace some tablets, your consumer model may no longer be available for sale. That's not the case with the ET40-HC/ET45-HC. The exact same device will be available for three years. And since Zebra's optional OneCare Essential and Select support services are available for a full six years from the initial date of sale, you can count on the support you need every day your devices are in use.

5

Mobility DNA — your tablet's built-in advantage.

Zebra Mobility DNA Professional provides powerful tools that no other tablet can offer — with solutions that make every aspect of owning your tablets easier. For example, you can stage tablets in seconds. Enter captured barcodes into your apps — without any programming. Control which GMS services and apps are available. Boost device security by adding features to Android. And you can unlock more tools to boost workforce productivity with optional Mobility DNA Enterprise.

APPLICATIONS

Facilities

- Acute care: hospitals and clinics
- Non-acute care: ambulatory centers

Use Cases

- Tele-health
- Video conferencing
- Patient monitoring
- In-home caregivers
- Patient engagement at bedside
- Patient entertainment
- Patient identification
- Patient self check-in/registration
- Medication/specimen collection
- Staff management
- Staff communication
- Workstation-on-wheels applications
