Advatek Inventory Management

ADVATEK SYSTEMS

BRADY®

Brady CT32

Hardware: Brady CT32

Software: Advatek Inventory Manager (AIM)

One-liner: Inventory management solution with real-time visibility and traceability for small to mid-size facilities.

Solution: Advatek AiM is a mobile, scan-driven warehouse and inventory management solution that helps food manufacturers track every ingredient from receiving through finished goods. Paired with the Brady CT32, it enables teams to capture lot numbers, manage production, maintain complete traceability, and access real-time inventory visibility. The result is greater efficiency, simplified compliance, and faster response to product recalls.
