BlueFletch Healthcare Security Solution

BlueFletch Healthcare

BRADY®

Brady CT37HC

Hardware: Brady CT37HC

Software: BlueFletch Healthcare

One-liner: Badge-tap login built for the pace of clinical care

Solution: Clinicians lose minutes every shift to device logins, password resets, and credential workarounds. BlueFletch Healthcare reduces authentication to under one second via badge tap, biometrics, or PIN-based SSO, returning time to patient care on every shared device. HIPAA and SOC 2-certified with automatic logout and per-user audit trails. Works with existing EHR, MDM, and identity providers. No proprietary server required. No rip-and-replace.
