THE HUMAN ELEMENT  
OF AUTOMATION™

# CHECKMATE 1000 POS STATION

## Smart Solutions for Enhanced Retail Productivity

### QUEUE BUSTING

Add POS-ready carts as needed to speed checkout and reduce potential lost sales due to long wait times.

### ON-DEMAND CAPACITY

Add POS stations for peak periods without expensive buildout. Stow during slow months to repurpose retail space.

### RAISE SERVICE LEVELS

Turn your fitting room area or other part of the store into a speedy service point by providing checkout right out of the gate!

The value of ensuring your shoppers have a great checkout experience during high-stress shopping season is often the difference between \$500K - \$1M of lost sales per store, per month.

And yes, you might have 15-20 fixed registers installed for the 3-4 months you use them. 10 registers sitting idle for most of the year occupies costly real estate. Use that space to display more product that improves your customer's experience and your revenue stream.

Newcastle's CheckMate POS Station can make that happen.
