# TURN YOUR WAREHOUSE INTO A POWER HOUSE

**NEWCASTLE SYSTEMS**
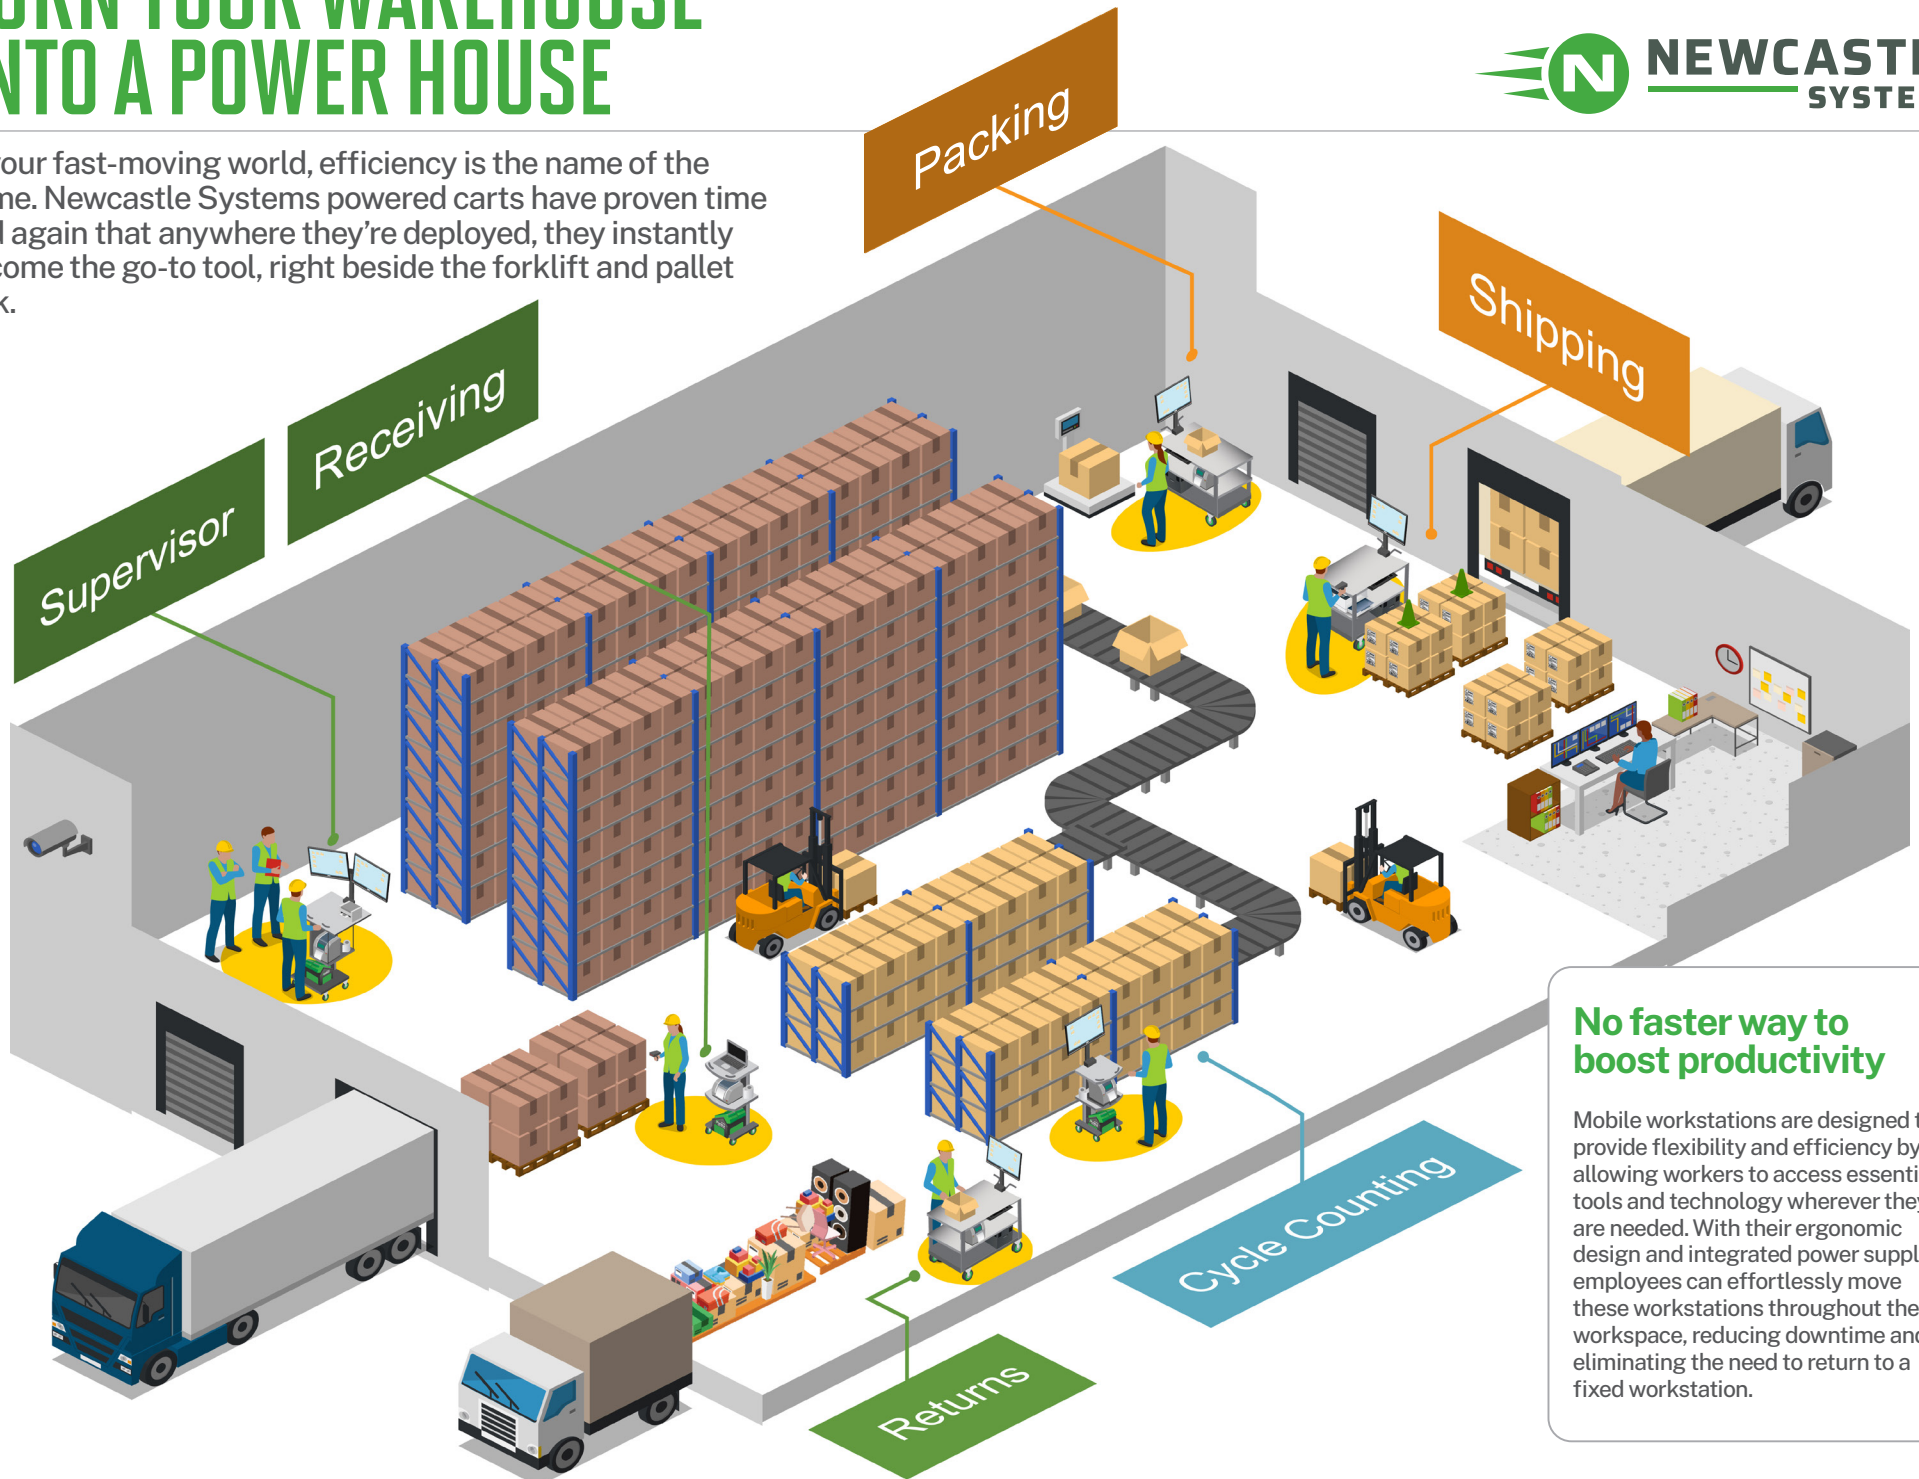

In your fast-moving world, efficiency is the name of the game. Newcastle Systems powered carts have proven time and again that anywhere they're deployed, they instantly become the go-to tool, right beside the forklift and pallet jack.

## No faster way to boost productivity

Mobile workstations are designed to provide flexibility and efficiency by allowing workers to access essential tools and technology wherever they are needed. With their ergonomic design and integrated power supply, employees can effortlessly move these workstations throughout the workspace, reducing downtime and eliminating the need to return to a fixed workstation.

# PLATFORMS FOR PRODUCTIVITY

Most warehouse, DC and logistics personnel walk as much they work. Great for leg fitness, not great for your bottom line. Our carts bring workers where they're needed and keep them on task, with all-day power right on board.

## RECEIVING

If you're running a dock with a stationary printer, you're bleeding productivity. Our Mobile Receiving Stations enable your workers to print right at the pallet, increase dock-to-stock by 50% or more, and eliminate 90%+ of label errors.

## RETURNS

Streamline your returns process by eliminating manual labor and tedious paperwork with access to real-time inventory, accounting, and order systems. Equip your cart with cameras to take pictures for proof of condition for return records, enabling quick crediting of customers and updating of returns in the inventory system, allowing for rapid fulfillment of new orders.

## CYCLE COUNTING/ INVENTORY

Using a PC/laptop, scanner, and printer, workers have real-time access to inventory systems and data capture, eliminating the need for tedious paperwork and manual data entry. The ability to replace damaged labels on the fly during cycle counting enhances accuracy and efficiency and eliminates the need to walk back and forth to stationary desks, significantly improving the overall inventory management process.

## SUPERVISOR STATION

Our Mobile Supervisor Station is not only a solution for on-the-go productivity but also empowers managers/supervisors to break free from their fixed desks and offices, allowing them to actively engage on the plant floor. With a spacious work surface and access to real-time information, supervisors can provide support, deliver training, collect vital data, and more.

## PACKING

Experience unparalleled efficiency with our fully-loaded Mobile Packing Stations. When inundated with single-item orders for the same product, the traditional picking, sorting, and packing process can be impractical and wasteful. Our Mobile Packing Station promises exceptional accuracy and fast processing times.

## SHIPPING

Replacing stationary desks with a Mobile Shipping Station allows your workers to print the shipping label, packing slip, and bill of lading right at the pallet. No errors plus you'll get your shipments out 30% faster.
