UNREAL SCANNING GIVES YOUR APP THE EDGE

Any mobile device with a camera can become an enterprise-grade barcode reader facilitating quick collection, analysis, and storage of vital data. CortexDecoder® SDK can eliminate critical data gaps that impede real-time decisions.

ELIMINATES USER FRUSTRATION

CortexDecoder performance delivers a revolutionary user experience, positively impacting business productivity and revenue. Barcode reading is now viable for more applications than ever before.

Simply the fastest & most innovative barcode scanning software available!

Near-zero-miss barcode scanning on any platform. Every scan—every time.

Reads 40+ symbologies including DPM (direct part mark) barcodes

Flexible offline licensing

Scan small or even multiple barcodes in motion

Multiple SDK configurations to fit your project:
- Android
- iOS
- Windows 10 Mobile
- Linux
- macOS
- Xamarin

VERSATILITY FOR EVERY INDUSTRY

Whether reading barcodes from retail products, prescription bottles, IDs, phone screens, circuit boards, engine parts, or microprocessors, this SDK will expand your market reach.

GET PEACE OF MIND FOR YOUR TEAM & USERS

With a history of proven performance and the backing of world-class support, your team can get up and running with confidence in no time. **Discover how CortexDecoder can expedite insights for your customers.**
