

# Security Identification Solutions

○ Connecting health systems to what matters most

## Connecting You to Safety, Security and Peace of Mind

Accurate visitor and employee identification is essential to healthcare safety. Positive identification lets staff instantly know who is authorized to be onsite—strengthening security and peace of mind. By clearly identifying everyone within the facility, hospitals create a secure environment for caregivers and a reassuring, welcoming space for patients and their loved ones. **PDC end-to-end ID solutions enable:**

- Increased patient safety
- Peace of mind
- Controlled access to restricted areas
- Meeting joint commission standards
- Increased staff productivity
- Clear identification of clinicians

Day after day, shift after shift, you can depend on PDC's highly reliable security identification solutions purpose-built for your workflows.

Get peace of mind by partnering with the supplier trusted by over 90% of US hospitals for more than 70 years.

## Certis® Thermal Visitor Identification Printers

### Print Visitor Badges in Seconds

- Quickly personalize visitor badges or wristbands with direct thermal technology — no ribbons or ink required
- Compatible with your existing visitor management system
- The printers are lightweight with a small footprint, but powerful and reliable for minimal downtime
- The PDC Technical Team ensures printers are fully integrated and functional with visitor management systems. Includes loaner printer during repairs

## Visitor Management Systems

### Screening & Reporting for a Secure Campus

- Visibility and tracking for visitors and vendors when they're on location, as well as the ability to pull visitor reports to track trends
- Cross reference visitors against patient-specific or national watch lists
- Know who is onsite during emergencies for effective notification and alerts
- Save resources by pre-screening visitors and using self-registration kiosks
- Interface with Epic, Cerner, MediTech and more in accordance with HIPAA regulations

## Tempbadge® One-Step® Visitor Badges

### Quick & Easy Badges with an Adhesive Backing

- Simply fold the large tab to activate
- The adhesive back makes it easy to attach this badge to the wearer — no clips required
- After a full-day's use, a large "VOID" will appear on the badge, clearly indicating a guest's time is up and preventing badge reuse
- Quickly add a guest's name, the date and other important information

## Tempbadge® Two-Step® Visitor Badges

### Clip-On Style Badges with Mix & Match Versatility

- Identify visitor categories or match the color to your brand
- Choose from "Visitor," "Contractor," "Vendor" and "Temporary" titles
- Slotted to attach a badge reel, lanyard or clip for easy and accessible scanning; use of the back piece allows for easier cleanup
- Use barcodes to scan for access to authorized areas
- After a 1-day or 7-day use, a red bar pattern will appear on the badge, clearly indicating a guest's time is up to prevent badge reuse

## Expireband® Visitor Wristbands

### The Most Secure & Convenient Way to Identify Visitors

Bringing expiring ink technology to a wristband for the first time.

- Remains securely attached to visitor for duration of visit
- Comfortable, secure and won't end up stuck to your floors or walls
- Use barcodes to scan for access to authorized areas
- Compatible with PDC Certis® and other leading direct thermal printers

## Basic Visitor Badges

### Simple & Cost-Effective

Non-Expiring, adhesive and clip-on badges are easily printed and issued to your visitors for a simple solution.

- Non-expiring solutions are recommended when your visitors are only on site for a short period of time
- This simple, non-expiring solution ensures you keep costs at a minimum
- Multiple colors available to use specific colors to indicate type of visitor or access levels
- Thermal, inkjet or handwritten adhesive badges are available to be efficiently printed and issued using your technology of choice

## Employee Identification Credentials

### Find the Perfect Match for Your Facility's Brand & Security Needs

- We can exact-match the technology in your current cards or help you upgrade to a new card technology with better lead times and pricing
- Cards are available with a variety of technology (standard, proximity or smart) to fully integrate with your access control and security systems
- Further secure credentials with our visual security features including IDentiGuard™, HoloKote® and more
- Quickly communicate provider roles at a glance with the use of Badge Buddies
- PDC can be your full solution provider, working with your IT and security teams for a fully integrated, hassle-free credential program

## Magicard® Card Printers

### Print Secure Employee Credentials On Site

- Presto card design software is free with the purchase of a Magicard printer, allowing you to easily design and print employee credentials
- Free HoloKote® designs come standard with every Magicard printer; these patented visual security watermarks make it virtually impossible to counterfeit credentials
- The PDC Technical Service Team helps organizations optimize card printers for efficient, worry-free production, while our warranties provide peace of mind

## Full Customization & Card Printing Services

Print variable information on site, while PDC bulk prints your full-color branding.

### Let Us Handle Your Bulk Card Printing to Save You Time

- Free up internal resources and eliminate the cost of overhead, ink, toner and ribbon by letting us handle the card printing process
- Pre-branding or full-service card printing is available based on the needs of your organization
- Sophisticated security features including holographic images, foiling, embedded imaging and more
- Customize cards to include crucial information such as reminders, values, codes or response tips
- Emergency codes, contact cards or other information specific to your facility is easily accessible by staff when they need it most

## Custom Identification Accessories

### Keep IDs Visible at All Times

- Extend the life of employee credentials with durable badge holders
- Secure credentials and make them convenient to scan for timekeeping, keyless entry, record tracking and more with the use of badge reels
- Choose breakaway lanyards designed for employee safety and keep badges facing forward as required by some state regulations with twist-free badge reels
- Fully customize ID accessories to match your brand, convey your message and give employees a sense of community

## Code® Barcode Readers

Barcode Scanning for Safer Patients, Visitors & Employees

**Near-Zero Miss Scanning** Save critical seconds by reading any barcode, in any condition on virtually anything — scanners won't slow workflows

**Codeshield® Plastics** Durable, disinfectant-ready plastics outlast “antibacterial plastics” by withstanding sanitation with healthcare-grade cleaners — chemicals won't cause yellowing, cracking or early failure

**Govt-Grade Encryption** Select CR2700 Barcode Readers are NIST FIPS 140-3 certified — get government-levels of data security and interoperability for your facility

**Data Parsing** Use JavaScript programming to easily parse, sort and contextualize data — scanners scale with healthcare needs

**In Stock** Mission-critical barcode readers are ready to ship — stop waiting, start scanning

**Fast Verification** Scan employee ID badges, visitor badges and wristbands at key access points, and connect with your visitor and employee management systems

We're powered by Brady—a global provider of interconnected identification solutions at scale.
