Vertical Systems Rapid RFID Asset Tracking

Honeywell

Honeywell CT47
IH45 RFID Scan Handle

Hardware: Honeywell CT47 Mobile Computer & IH45 RFID Scan Handle

Software: *RAPID*RFID

One-liner: Inventory Management and Asset Tracking with RFID

Solution: RAPID RFID is an RFID Middleware that is commonly used for asset and inventory management. Paired with the Honeywell CT47/IH45 combination allows users to quickly collect and find inventory. Using RFID technology for cycle counts and physical inventory is proven to dramatically reduce labor and increase inventory accuracy. It can be used as a stand-alone solution or integrated into existing WMS/ERP systems.
