CT32 SOFTWARE

Device Client Pack

The Device Client Pack (DCP) includes Launcher, Enterprise Browser, BasicTE, and Mobility Web SDK, these applications are pre-loaded on the device.
All CT32 units include a 1 Year DCP Termed Pre-License for initial evaluation of the DCP applications (it does NOT include a Perpetual Pre-License), after the 1 Year Term period expires, a Perpetual or Term license is required to be purchased.
There are two licensing options that can be purchased for DCP:

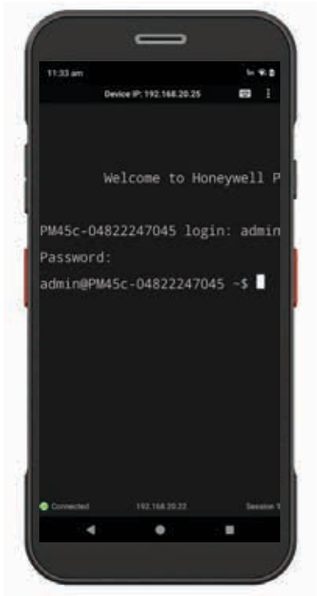
1. Perpetual License — Purchase DCP-001 - Perpetual Licenses operate without expiration for the authorized software version features, and includes 1 year of Maintenance. Add additional Software Maintenance separately.
2. Term + Maintenance License — Purchase DCP-SFT1, DCP-SFT2, DCP-SFT3, DCP-SFT4 or DCP-SFT5 - Term + Maintenance Licenses provide software operation, software new version features, and tech support, all for a defined period.

Device Client Pack

Launcher

Launcher - gives the customer total control over which apps can be run on the device.

BasicTE



BasicTE Android device Terminal Emulation is a simplified alternative for those not yet ready to upgrade to SmartTE.

Enterprise Browser

Enterprise Browser provides corporations the ability to run standard web applications from a controlled environment.

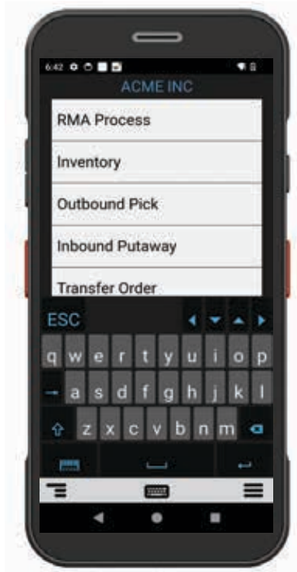
Ivanti Velocity

Ivanti Velocity is an industrial mobile client that incorporates support for both telnet and web host applications, designed with barcode scanning and text input in mind, Velocity integrates with Honeywell mobile computers and supports fully customizable context sensitive keyboards to ensure accuracy and speed of data input.
There are seperate licenses for Velocity TE or Velocity WEB that can be purchased, only subscription licenses are available to order.

Velocity TE

Native Mode



Modernization

Velocity TE - Terminal Emulation that supports the most commonly used emulation types, including VT, 5250 and 3270. Easily set up controls that validate, convert and parse data from scanned barcode data and streamline workflows by automating common functions. Create custom keyboard maps and host profiles as well as hot keys to shortcut common commands and processes.

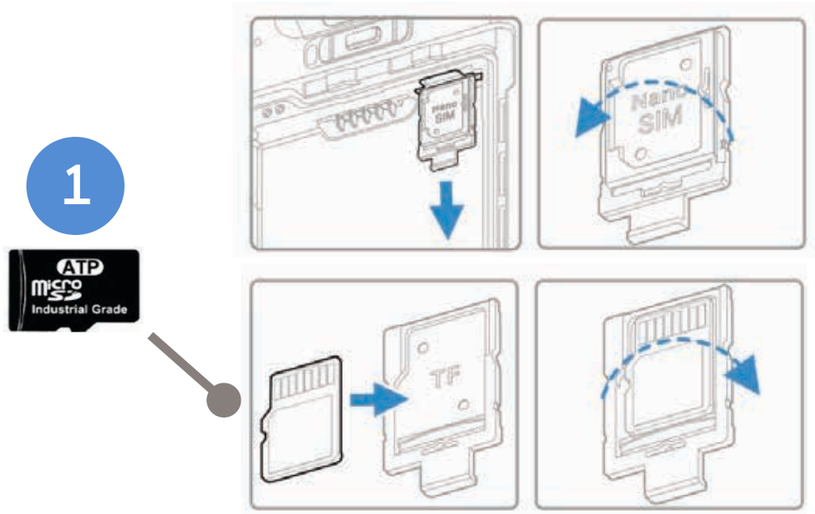
Micro-SD Cards

Honeywell Recommended – ATP Industrial Grade Micro SD Cards



Why ATP Industrial Grade SD?

ATP's SIP (System-In-Packaging) manufacturing process encapsulates all exposed components and points of failure to ensure the products are fully waterproof, shockproof, and ESD (Electro-Static Discharge) proof. ATP Industrial Grade SD/SDHC Cards can withstand at least an operating/storage temperature range of at least -40 to 85 degrees Celsius. In addition to this temperature range, the cards are completely waterproof, dustproof, and ESD (Electro-Static Discharge) proof. All ATP Industrial Grade SD/SDHC cards are produced under a stringent RoHs and Green Package compliant manufacturing process to guarantee a consistent high level of build quality and performance. ATP Industrial SD cards deliver outstanding performance with read speed (seq) up to 18MB/sec and write speed (seq) up to 16MB/sec. All ATP Industrial Grade CF, SD, USB drives, and SSDs are constructed using best-in-class SLC(Single-Level Cell) components with enhanced Error Correction Code(ECC) functions and wear levelling algorithms. This results in MTBF ratings over 2 million hours and the highest write cycle lifetimes in the industry.
